

About Reading Results

Reading Results partners with schools to support students from systemically excluded communities in becoming successful readers. We believe that literacy is a basic human right, and we work to increase access and break down barriers through supporting students with an effective, individualized, culturally-responsive reading intervention program.

Reading proficiently by third grade is critical to a child's educational development. Falling behind creates challenges that negatively affect a student's educational experience and self-esteem for years to come. Working through an equity lens, Reading Results is committed to helping struggling learners get on the path toward academic success and a brighter future.

Our Reading Support Program

Reading Results partners with schools to identify early-grade students who are falling behind in reading and provides student-centered, individualized reading support. Our highly trained tutors (licensed teachers and members from the school community) deliver a culturally-responsive program designed to accelerate literacy and foster an academic mindset. Tutors meet 1:1 or 1:2 with struggling readers for 30 minutes, three times per week throughout the school year.

Our Results

Students who complete a full year in our program make an average gain of 1.6 years of reading skills and an average gain of 32 words per minute in reading fluency.

In the 2025-2026 school year, we will:

- Serve over 900 students, expanding outside the Portland/Metro area.
- Provide one-on-one and one-on-two individualized tutoring sessions to students.
- Support students in making significant growth toward meeting grade-level reading benchmarks.
- Continue to work toward being more culturally responsive based on consistent awareness and implementation of racial equity improvements.
